HISTORY

My experience comes from working with bmf GmbH, a german company providing e-commerce solutions and data services for medium-sized customers in the automotive sector. My responsibilities are focused on a highly configurable vehicle configurator.

FRONTEND DEVELOPMENT
February 2018 - Now

Worked out new concepts to improve usability

Created views with HTML, CSS, Javascript and KnockoutJS

Increased front-end efficiency by code analysis and refactoring

Participated in all stages of the product life cycle

PROJECT MANAGEMENT
November 2017 - January 2018

Coordinated a team of international developers in an agile workflow

Technical specification, documentation and bug report with JIRA

Took an active part in UI/UX discussions

GONE TRAVELING
November 2014 - October 2017

Lived in New Zealand, Sri Lanka and Australia

Got addicted to surfing

Fitted out several vans to live in it

Worked in various industries and environments

WEB DESIGN (APPRENTICESHIP)
September 2012 - November 2014

Set up automatic image processing tasks

Designed websites with Adobe Photoshop

Extensive use of HTML, CSS and jQuery

Implemented responsive frameworks into existing projects
